iMPULSiON[®] contra-angle for implantology - Latch type head with stop system

The ultra-miniature latch-type head offers practitioners optimum work comfort with maximum visibility of the implant site.

The **iMPULSiON**[®] handpieces are thermo-disinfectable so as to meet high standards of asepsis.

Meeting the demands for a lower cost without any concessions in quality.

The main assets of the new range of contra-angles for implantology **iMPULSiON**[®] are :

- Smallest head on the market for unequalled visibility! *
- Unbeatable quality/price ratio!
- Optimal handgrip.
- Thermal disinfection for impeccable maintenance!
- Torque of up to 50 N.cm.

* For latch-type head only.
