

## **BILL SCHAEFFER**

*Implant Surgeon, Co-founder of The Implant Centre*

Bill's extensive experience in hospital-based surgery has given him a passion for collecting data about the work that he and the colleagues he works with do. As he himself admits, "I am obsessive about auditing the implants that we place. Without this you simply cannot tell with certainty what works and what doesn't, and it is the only way to continuously improve what you do".

Bill has served extensively on the Committee of the Association of Dental Implantology. The ADI is the largest implant organisation in the UK and is dedicated to improving the standards of implant dentistry in the UK.

Bill is also an experienced lecturer and he is regularly invited to speak on the very latest aspects of dental implants all over the world.

In his spare time, he likes to skydive, ski, snowboard and mountain bike, and he is now learning how to kitesurf.
